

Spotless Ceramic Finish

Water stain remover for ceramic-sealed surfaces

page 1 of 1

Spotless Ceramic Finish is a water stain remover for the gentle removal of water and limescale stains on ceramic-sealed vehicles without affecting the sealant. The product easily removes fresh limescale stains from the sealant. In addition, the treated surface regains a convincing color deepening, a streak-free shine and its original smoothness.

Areas of use

Vehicle paint, easy to apply on our ceramic coatings (Cb0.01/C0.02).

Recommendations for use

Heavily soiled surfaces must be adequately cleaned. Before using Spotless Ceramic Finish on ceramic-coated vehicles, carry out an appropriate pre-wash (e.g. with Green Star). Then wash the vehicle with Reactivation Shampoo according to the instructions, rinse thoroughly and dry thoroughly.

Spray Spotless Ceramic Finish into a microfiber cloth using a spray bottle and apply evenly to the surfaces to be treated. A thin film should be visible. Depending on the level of limescale staining, leave on the surface for up to 3 minutes and then polish off with a professional microfiber cloth. If necessary, wipe with another clean and dry microfiber cloth.
