VENOL SYNTHESIS SILVER SN CF 0W20

Application:

Engine oil developed with the use of the highest quality synthetic base oils and oils derived from hydrogen processes and modern functional additives. Intended for the lubrication of the most modern gasoline engines and turbocharging diesel engines . Especially recommended for engines requiring low viscosity Down Sizing. The oil ensures maximum engine power. It facilitates the cold start of the engine, and also perfectly protects it against wear both at low and high temperatures. It keeps the engine perfectly clean, extends the period between oil changes and significantly reduces fuel consumption. Recommended for hybrid cars as well as Asian and American cars, off-road vehicles and vans. It is miscible with other, branded engine oils of this type.

Characteristic:

It is made of the highest quality mineral and synthetic base oils, using a package of state-of-the-art enriching additives, ensuring excellent performance properties:

viscosity and temperature - they ensure optimal lubrication parameters in all temperature conditions, including the so-called easy engine start-up during high temperature drops,

anti-wear - significantly reduce the friction coefficient of cooperating engine components, increasing their life and reliability,

washing and dispersing - keep the engine in perfect cleanliness and protect it against all kinds of contamination resulting from operation,

antioxidant - allow for a long service life, minimizing the formation of high-temperature deposits,

anti-corrosive and anti-rust - effectively protect engine components against corrosion and rust.

Specifications and Standards:

Viscosity class SAE:0W20

Quality class API:SN/CF

Quality class ACEA:A5/B5

ILSAC :GF-5

Meets the requirements: Ford WSS-M2C947 – A; STJLR.51.5122; Chrysler MS-6395, MS-13340

VENOL SYNTHESIS SILVER SN CF 0W20	Typical values
Kinematic viscosity at 100 ^o C mm ² /s	8
Viscosity index	160
TBN (mgKOH/g)	10
Pour point C	-46
Flash point C	230
