

HOW TO USE SINTAN WHEN DEALING WITH HARD SURFACES:

How to use Sintan®:

1. Apply the preparation on polluted surface without dilution.

2. Wait 2-5 minutes.

3. Add small amount of water.

4. Clean out mechanically, scrubbing with brush or use pressurized water.

5. Wash with water or collect using sorbents or industrial vacuum cleaner.

Note:

Biodegradability of Sintan® and its penetrating and degreasing features, as well as the fact that it does not form stable emulsions, are confirmed by documents issued by independent research institutions.

SINTAN® may also be used in the kitchen and for removing greasy stains from clothes.

SINTAN® KITCHEN USE

Sintan® is ideal to use on such surfaces as:

glass, tiles, terracotta, metal plastic etc. Recommended to use when removing greasy and oily contaminations as well as other everyday contaminations from kitchen surfaces like: hoods, ovens, wall and floor tiles, kitchen tables and countertops etc.

USE:

Apply Sintan® on the contaminated surface, wait 3 minutes, and wash off using a sponge soaked with water. Do not store nor use in temperatures below 0°C.

SINTAN® FOR WASHING

Sintan® is a safe degreasing preparation for fabric. Sintan® is designed to remove greasy stains from fabric. We recommend to use the product in the minimum temperature of 40°C. Dermatologically tested.

Used on surfaces like: carpets, drapes, clothes, tablecloths. It does not destroy fabric nor discolour it.

USE:

Apply on the stain, wait 3-5 minutes, wash in a minimum temperature of 40°C (can be washed with other clothes).

Do not store nor use in temperatures below 0°C.

SINTAN® NEEDS TO BE DILUTED WITH WATER WHEN USED ON THE FOLLOWING SURFACES:

- Tiles and terracotta (dilute 1:20 with water)
- Windows, glass (dilute 1:30 with water)
