

KABI drum bung wrench in Aluminum

Description

KABI spanner is an indispensable tool to open all types of drums easily and conveniently. The spanner is made from cast aluminum which is hardened for increased strength, ensuring it can withstand years of hard work. The ends of the sheet pile wrench are carefully designed to fit most 2" and 3/4" sheet pile caps. This function makes the sheet pile wrench versatile and useful for different drum types. The compact design makes it easy to store, ensuring that it is always within reach when needed. 250 mm shaft length.
