

PurePreCleaner

Biogenic precleaner

page 1 of 1

PurePreCleaner is a highly alkaline pre-cleaner for car and truck pre-washing. The high proportion of complexing agents, surfactants and special additives based on biogenic raw materials spontaneously dissolves even the most stubborn deposits such as insects, bird droppings, environmental and wheel rim dirt and is therefore particularly suitable for car washes with short exposure times (e.g. express car washes) and for alkaline wash bay cleaning. PurePreCleaner is particularly suitable for biological process water treatment, where it is characterized by extremely improved biodegradability.

Areas of use

Passenger cars, commercial vehicles, construction machinery, steel rims and alkali-resistant painted aluminum rims, wash bay floors/walls.

Recommendations for use

Depending on soiling: Pre-cleaning: 1:30 to 1:100. Rim cleaning: 1:4 to 1:20. Apply to entire surface and rinse thoroughly after max. 1 min. using a high-pressure cleaner. Car wash cleaning: 1:2 to 1:15. VDA-compliant class B: max. exposure time 1 min, max. application concentration 1:100

Container

Container	Item no.
20 L	678020
	678088
200 L	678200

pH-value: 14

Warnings

Do not allow to dry. Do not use on hot surfaces. Check for suitability and compatibility before use
